

**⚓ SAILOR**

**THE SAILOR PEN CO., LTD.**

In 1911 Mr. Kyugoro Sakata, an engineer from the historic naval port of Hiroshima in Japan was introduced to a Fountain Pen brought from England by a sailor friend and he then became determined to produce finely crafted writing instruments in Japan with the highest specification and writing performance.

Mr. Sakata decided to call the Company SAILOR PEN in the expectation that the business would expand internationally like the voyages of a Sailor.

Sailor Pen thus became the first Company to produce Fountain Pens in Japan and it is still one of the oldest established Companies in the industry. The Sailor Pen Company has proudly maintained this heritage of quality and technical perfection over the 100 years of existence. Still today it offers the customer a unique variety of writing Instruments enhancing the pleasure of the writing experience.

\*Actual products may vary from the photographs because of printing.

\*Product availability and specifications shown in the catalogue may vary in some markets.

## MAKI-E

Traditional Japanese art - created to embody the harmony of man with nature. The MAKI-E process was introduced to Japan in the Asuka period and was established as a traditional art form by the noble society.

MAKI-E combines intricate lacquer painting with a variety of surface decorations, traditionally including powdered gold, precious metals, gemstones, mother of pearl etc. Typically Japanese designs inspired and created by well renowned artists are skillfully hand applied using natural Urushi lacquers and other precious materials.

The result is a most unique and magnificent surface treatment to be enjoyed by generations to come.

Kaga MAKI-E originates from the Kanazawa region of Japan and Taka MAKI-E is the very highest level of this decorative process.

These traditional decoration techniques can only be applied by truly experienced Japanese craftsmen having historical family skills and pride in such traditional art forms.

## Urushi Technical Art

A famous urushi artist Koushu Nishihara has created 5 special designs for this series using his top skillful techniques. He uses various traditional techniques with Urushi, MAKI-E and Raden (mother of pearl). The introduction of this series has provided a new type of decorative skill to a fountain pen in the market, and it is now classed as one of the highest level fountain pens in the world.

# The nib story

*Fine pen nibs only can only be produced by professionally skilled craftsman who painstakingly produce and perfect them by hand.*

*With a treasured fountain pen, the owner and user assumes an air of superiority as they practice the art of fine handwriting, spelling out current thoughts of mind.*

*A fountain pen in the hand becomes an extension of body and soul and is evidence of a well-developed human culture, with written words not born from a keyboard composition. Rising above the times a fountain pen will forever remain the highest quality means of human self-expression.*

Firstly gold and other precious materials are melted and then rolled into plates. It is then punched into shape and special tipping material is carefully applied to the pen nib. This tipping material determines the nib width, and it is polished extensively.

The whole nib including the tip is then slit down the middle to meet a carefully positioned hole cut on the center of the nib. This process determines the perfect ink flow and nib elasticity and is critical to maintain perfection.

Finally the top of the nib and tip are shaped to ensure the smoothest writing quality.

After final buffing of the nib, it adds a fascinating sparkle to the writing instrument.

# Nib Lineup

To cater for individual preferences and purpose of use, Sailor offers a range of available nib grades with most of the models.
